Director Sales Message

Building a sustainable society for future generation

Dynamic Group is one of its kind to have synergies across industries over Pakistan serving not only Commercial needs but also Domestic users.

We as a Nation are blessed with Natural resources and all 4 seasons, still highly dependent on foreign fossil fuels. To ensure energy security, a clean break from our dependence on foreign fossil fuels is imperative. Renewable energy has the greatest potential given the SUN is high in the lands of Pakistan.

Dynamic Renewables

لهریل روشن

OUR SERVICES

Survey

Gather property info and schedule the appointment. Review satellite imagery, assess roof condition, note obstructions, analyze shade, and photograph everything.

Planning:

Set project goals and assess site opportunities with utility data. Create an RFP, evaluate proposals, sign a contract and start your project.

Execution

Implement the project according to the approved design with client in compliance with the best engineering practices. As per the IEC standards applied for the Solar System.

Services

Operation and Maintenance including Software, Inverter Monitoring, Weather Report and Testing of Equipment.

Financing

Facilitate the Residential and Commercial clients under the on-going financing schemes. Support by the Government and the Commercial Banks.
